About me

Six years in equity research and portfolio strategy

I build forecasting models, write clear investment cases and help investment teams understand risk. I work across consumer and retail sectors and present to the portfolio committee every month.

$42M

assets covered in my research

3.1%

average forecast error on quarterly revenue

CFA

Level III candidate

6 years

in equity research and strategy

Experience

2022 to present

Senior Financial Analyst, Northgate Capital

Lead consumer and retail coverage and present investment cases to the portfolio committee.

2019 to 2022

Financial Analyst, Harbour & Co.

Built valuation models, maintained the earnings database and supported client reporting.

2015 to 2019

BSc Finance, University of Example

First-class honours. Dissertation on factor investing in emerging markets.

Selected work

From raw data to a clear recommendation

Consumer retail sector review

Valued 14 listed retailers with DCF and peer multiples. Trimming two overvalued holdings avoided a 9% drawdown the next quarter.

DCF, Comparable analysis, Excel

Revenue forecasting model

Replaced a manual spreadsheet with a driver-based Python model. Forecast error fell from 7% to 3%, saving two days of reporting each month.

Python, pandas, Forecasting

Portfolio risk dashboard

Tracks volatility, concentration and drawdown across 30 positions so the committee can review risk in one view.

SQL, Power BI, Risk analysis

Skills and tools

Analysis

Financial modelling, DCF and comparable valuation, forecasting, scenario analysis, risk assessment

Tools

Excel, Python (pandas), SQL, Power BI, Bloomberg Terminal

Communication

Investment memos, committee presentations, client reporting

Let's talk

I'm open to analyst and strategy roles, and to freelance modelling projects.
